Projects

Real Estate Agency (WIP): <http://czsmith.me/BellProperties/>

- Used HTML, CSS and Bootstrap to create this mock theme for a local real estate agency startup.
- Currently reworking this project in Vue.js to add responsive amenities section.
- Used Google Maps API to display house location. Updating this in Vue.js to responsively update the map location based on property selection.

Etch-a-Sketch: <http://czsmith.me/etchasketch/>

- Used HTML, CSS, and vanilla JavaScript to create a replica Etch-a-Sketch.
- Built for desktop browsers. Used the CSS grid to create the board. Board's cell count defined by user input at the bottom.
- Made a drawing mode which slowly darkens the cell, and a rainbow mode which chooses a random color from the rainbow on each hover.

Experience

BoastHosting, LLC (2009-2010), *Founder*

- Started my own website company. Provided web development and/or hosting services for several clients, ranging from a local insurance agency to a YouTube sponsored event in Australia.
- Developed website for local insurance agency using HTML and CSS.
- Integrated website with WHMCS using their templating engine.
- Partnered with Xenon Servers to aid with their web hosting clients.

Xenon Servers (2009-2015), *General Manager*

- Currently helping maintain website using HTML, CSS, Bootstrap, and JavaScript + jQuery.
- Integrated website with WHMCS using their templating engine.
- Installed, integrated, and hardened vBulletin forums to provide an extra support avenue for customers.
- Became General Manager after working as a tier 1 rep. Company has earned over a million in revenue.
